
nopa[®] instruments

and more...

thank you for choosing
nopa instruments...

...you obviously have good taste

The Company and its development

The firm of **nopa instruments** Medizintechnik GmbH was founded in March 1982.

Where do we stand today?

As a manufacturer and supplier of surgical, endoscopic and dental instruments, our company has meanwhile built an exceptionally fine reputation for high quality and reasonable prices.

Our well-trained employees offer you a totally flawless service, underpinned by a warehouse stocked to an excellent standard, with a value of between eight and ten million euros.

Even among our competitors, our cataloguing system is regarded as one of the best. Tuttlingen, the hub of the instrument manufacturing industry, has around 400 suppliers of surgical instruments. We are proud of the fact that we are among the five biggest suppliers.

Our most important trade fairs

We present our product range at **MEDICA** in Düsseldorf, at **Arab Health** in Dubai and at **Medic Asia**. In addition to these three main exhibitions, we attend other local trade fairs around the world, like **Medic West Africa** and **Medic East Africa**, **Africa Health**, **Hospitalar** in Brazil or **Zdravookhraneniye** in Russia etc..

The customer at the centre

Our quest for perfection and our high quality standards are not least documented by our certified quality management system in accordance with ISO 13485, as well as by CE approval. As one of the first manufacturers, we were able to implement this certification as early as 1995. From the internet, you can download the certificates, which are of importance to you.

In the showroom of about 150 m², the size of our product range is displayed and training courses are held; it is also a pleasant venue for customer dialogues. Groups of hospital representatives and surgeons can choose instruments on the spot and obtain qualified advice.

Catalogues and selling aids

We make our product range available to our customers with the aid of sophisticated media materials, in a user-friendly, accessible and comprehensible form.

>> Quality +

nopa instruments stands for a long tradition, a high level of expert knowledge and, above all, excellent quality and a fair price-performance ratio.
